Consulting Services

ECOM provides end to end information technology services and solutions to clients, both in public and private sector. ECOM is a full life-cycle consulting firm providing results-oriented and value-based services for its clients. Our consultants have worked with various technology management teams in leading companies, nationwide, achieving the clients' objectives.

Why us:

- ECOM's consultants work towards providing organizations an efficient and economical way to procure the right consultant to accomplish their needs.
- We work with your company's management team to develop detailed action plans and achieve results. Our consulting services help organizations achieve higher productivity, standardize processes and integrate business functions across multiple business units and geographical locations.
- Our consultants apply in-depth industry knowledge, proven program management skills and best practices to help clients maximize the return on their investments. We provide customized solutions to meet the changing needs of our clients. We collaborate with our clients to deliver tangible business results that impact their bottom line utilizing leading industry methodologies to in-house proven models.

To understand the industry, the perspective is to foresee market opportunities and help clients to capitalize on these by enabling them to create and manage Information Systems that:

- Execute short-term assignments as well as mission-critical projects.
- Enhance the company productivity and performance by simplifying systems.
- Earn an unrivaled reputation by providing quality service and ensuring ongoing client satisfaction

ECOM helps its clients to define their future today by providing them with professional consulting services across various industries.

ECOM provides following services:

STRATEGIC PLANNING

What are the organization's goals, needs and priorities? We determine the type of information that needs to be collected, tracked and analyzed, and assess the adequacy of existing tools and systems.

PROCESS IMPROVEMENT

Are your people and systems being used most efficiently and effectively? We evaluate policy and procedural changes that could provide a greater return on your investments.

REQUIREMENTS DEFINITION

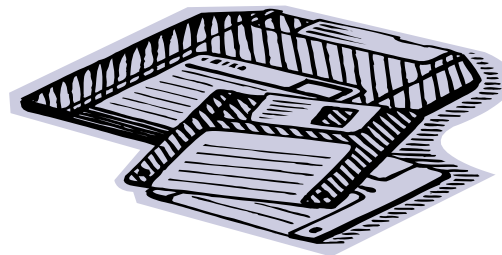

Our consultants recommend the technical solutions and system improvements that will solve the organization's information technology challenges within available budget.

IMPLEMENTATION ROADMAP

We analyze the interdependencies among existing programs and processes, and recommend the order in which change should occur.

Other Services offered

- Web development/design
- Data extraction and Conversion
- Networking and VOIP services
- WiFi installation and maintenance
- Payroll Services
- Security surveillance system - installation and maintenance

Six Sigma Implementation & Training

SIX SIGMA PROGRAMS

- Six Sigma Green Belt
- Six Sigma Black Belt
- Accelerated Lean Six sigma overview
- Lean Initiatives
- Root Cause Analysis

ITIL Training

The training is dedicated towards obtaining the latest possible ITIL Certification, V3. ECOM provides an extremely detailed, modular classroom approach to the terminology, fundamentals, definitions and goals of core IT service management processes and functions, according to the best practice IT information library framework. The focus will be on real time examples. The course is directed towards understanding the ITIL service management training program in the context of examining the tasks that people in the organizations will perform and skills required in order to perform specific tasks.

Benefits to a corporation

The primary goal for every company is to make money, by increasing profitability and cash flow while reducing cost.

Towards this end, our training programs impart structured methodologies to effectively identify issues, convert the issue to a statistical measurement, perform root cause analysis, develop and implement viable solutions and finally, develop control plans to sustain improvements.

Net Result –This is a huge finance benefit to companies.

Benefits to an individual

It imparts the most marketable skill set possible to individuals seeking employment or career progression, more so than any other program.

Technology and Strategy solutions for business excellence!
